

Information Technology Solutions

RESULTS

For over 25 years, CALIBRE has provided trusted support and innovative solutions to solve organizations' most important Information Technology needs.

>> **Solutions Provider.** From desktop support to mainframe modernization, our highly qualified team of IT professionals provides cost reducing solutions. Our solutions team develops and engineers modern applications and systems that provide global, secure access to cost performance portals, utility metering systems, and real-time logistics, worldwide.

>> **Systems Integrators.** CALIBRE's systems integration expertise provides organizations, ranging from the DoD to the Volkswagen Group of America with unique end-to-end solutions that solve some of the toughest data challenges in today's modern business environment.

>> **Technical Experts.** With experience delivering applications through public, private, and hybrid clouds, CALIBRE seamlessly transcends and navigates through the complexities of the cloud to provide best-in-class enterprise services.

Does your organization have the tools and resources necessary to meet today's technological demands? Do you believe there is untapped potential for greater technical efficiency within your organization?

CALIBRE provides tailored, integrated, and adaptable solutions developed using leading edge technology and proven methodologies that reduce operating costs; delivering value while answering the challenges of today and tomorrow.

Technology Consulting – CALIBRE drives value and innovation by utilizing industry best practices and implementing state-of-the-art technologies to increase security, lower costs, and improve performance.

With deep knowledge in Business Process Management, Enterprise Architecture, and Data Flow Modeling, we ensure our technology initiatives are aligned to an organization's mission.

>> **Cyber Security**

CALIBRE's Risk-Based Security Management (RBSM) techniques enable organizations to make mission and cost-justified investments to protect themselves from today's evolving threat landscape.

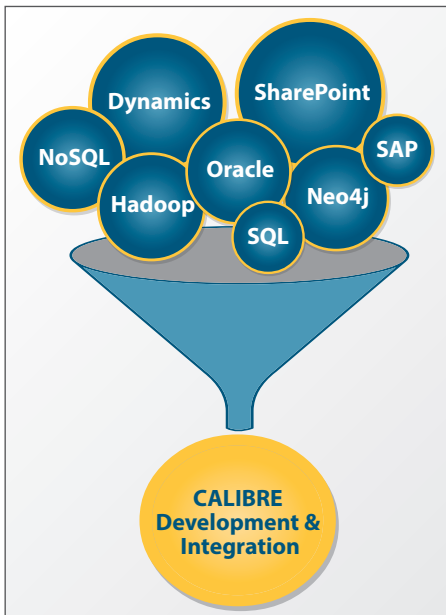

>> **Technology Strategy and Enterprise Resource Planning**

CALIBRE supports organizations in executing their mission more efficiently and effectively. Our expertise delivers solutions that maximize organizations' return on investment, improve collaboration, and better align organizations' missions with current and future technologies.

>> **Portfolio Management**

CALIBRE supports the full lifecycle of IT strategy, planning, and execution.

Risk-Based Security Management (RBSM)	Pre-Site <ul style="list-style-type: none"> Identify stakeholder Identify stakeholder's costs Determine organization's appetite for "risk" 	On-Site <ul style="list-style-type: none"> Conduct technical security assessment (Nessus5, DB Protect, AP Inspect, Cobalt Strike) Conduct operational security assessment (physical site inspection of security) Evaluate operational and technical security threats 	Post-Site <ul style="list-style-type: none"> Provide a comprehensive report translating identified threats into mission risk aligning with NIST Cybersecurity Framework Enable program investment that is mission and cost justified

Development and Integration – CALIBRE delivers mission-critical, custom software development, integration services, and modification of commercial-off-the-shelf products, on-time and within budget.

CALIBRE is rated at CMMI Maturity Level 2 and Capability Level 3 for Configuration Management, Measurement and Analysis, Project Monitoring and Control, Project Planning and Requirements Management.

>> **Software Development**

CALIBRE employs a unified, agile approach in which systems are built through proven and repeatable processes that mitigates challenges typically associated with the development process. Working components are delivered at the end of defined cycles to meet project goals.

systems with next generation platforms, ensuring data fidelity and accessibility.

>> **Mobile Applications**

CALIBRE is at the cutting-edge of today's fast-paced mobile lifestyle demands. Through deep understanding of the latest in web and mobile technologies, our solutions ensure that organizations can securely access data when needed, regardless of location or device utilized.

>> **Integration Services**

CALIBRE's wide breadth of experience in multiple languages and frameworks allows for the integration of existing legacy

Cloud Computing – CALIBRE transforms legacy infrastructure and applications into the modern cloud, offering organizations cost-effective agility and scalability.

>> **Data Center Transformation and Modernization**

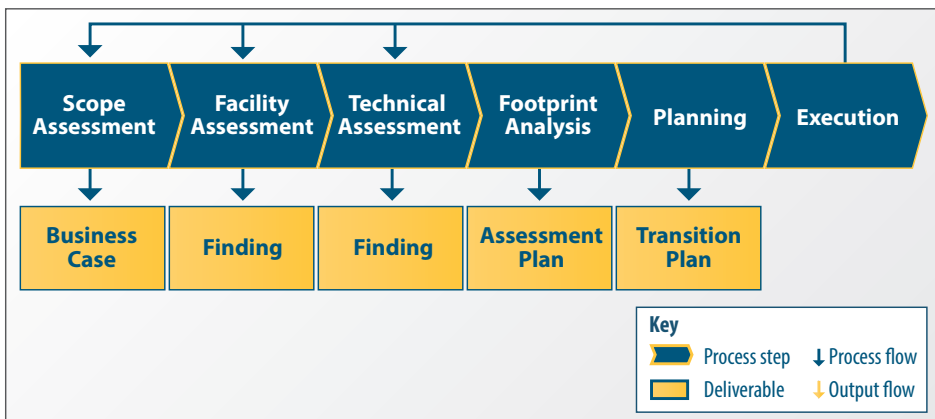

CALIBRE's trademarked COMPASS methodology optimizes investments in IT infrastructure through the design and architecture of modernized and consolidated data centers, by employing cloud focused and virtualized solutions.

>> **Cloud Computing Services**

CALIBRE views the cloud as a way to enable organizations to operate more efficiently. Through the implementation of public, private, and hybrid clouds, CALIBRE provides the customized solution that helps organizations achieve their mission at less cost.

>> **Operations Management**

CALIBRE's certified IT professionals are committed to ensuring that IT assets perform at their peak. Our end-to-end support services provide organizations with reliability and peace of mind; allowing the ability to focus on business objectives.

ABOUT CALIBRE

CALIBRE Systems, Inc. is an employee-owned management consulting and information technology solutions company supporting government and industry. CALIBRE is committed to the success of our clients and delivers enduring solutions that solve management, technology, and program challenges.
