

# HISTORICAL ANALYSIS AND ARCHIVAL RESEARCH

**CALIBRE**  
*Our Success Follows Yours®*

CALIBRE Systems, Inc. is an employee-owned management consulting and digital transformation company supporting government and industry. We provide support across a wide range of complex historical, archival, and cultural projects for Federal, State, local, and commercial sectors. Our team is the key to our approach, and includes highly specialized subject matter experts (SME) in historic and archival research who build reports with actionable insights, research-based conclusions, and innovative recommendations.

DEEP EXPERTISE

### Historical Research, Analysis, and Reports

CALIBRE SMEs are industry leaders in archival research using a variety of methods to build comprehensive reports that meet client needs.

### Program Planning and Decision Support

CALIBRE supports Federal and commercial clients with the use of historical research in environmental decision making.

### Data Collection, Integration, and Management

CALIBRE creates and provides management for systems that catalogue and conserve archival items, regardless of scale or variety of material.

### Historic and Cultural Assessments

CALIBRE staff is well versed in supporting organizations through the requirements of Section 106 of the National Historic Preservation Act.

### Museum Support

CALIBRE provides full-service support from removing artifacts to conservation to curatorial and exhibition duties and educational program assistance.

DEMONSTRATED IMPACT

### Munitions and Explosives of Concern (MEC)

CALIBRE conducts historical research to pinpoint where MEC may be present, and in what quantities. CALIBRE was instrumental in developing the DoD Report to Congress on sea disposed munitions, and analysis of the associated safety and chemical risks. Our efforts enabled DoD to meet its statutory obligations on time and on budget.

### Bureau of Ocean Energy Management (BOEM) MEC Survey Methodology

CALIBRE developed the BOEM MEC risk evaluation framework for offshore wind energy development. CALIBRE's application of the framework to existing underwater infrastructure for a commercial client included review of historical archive information to check the potential presence of MEC, an evaluation of the potential impacts to specific operations, and a determination of relative risks of MEC to operations.

### Recovered Chemical Warfare Materiel (RCWM) Historical Data Analysis Reports

CALIBRE's SMEs have been supporting the RCWM Program for five years. Providing extensive research at locations nationwide, and then analyzing and distilling the information in comprehensive historical reports. These reports provide specific information about the types, quantities, and locations of chemical munitions to aid in budgeting for investigation removals, and safety planning.

Over  
**10 years**

of experience in archival underwater munitions research

Conducted initial research for BOEM on munitions usage near  
**11 Atlantic**  
offshore wind energy areas which encompass  
**1.96M acres**

Historical reviews of over  
**200 sites**  
in **41 states**  
in support of environmental restoration

Reviewed  
**hundreds of historic & cultural documents,**  
28 cultural sites, and numerous species for Fort Irwin

# HISTORICAL ANALYSIS AND ARCHIVAL RESEARCH

## DEMONSTRATED IMPACT

### National Environmental Policy Act (NEPA) Compliance

CALIBRE conducted extensive historical and environmental research and monitoring for Fort Irwin's National Training Center to assist with their expansion efforts and NEPA compliance. Historical efforts involved compliance with the National Register of Historic Places and research dedicated to discovering significant Paleo-Indian sites. Monitoring efforts included observing locations of endangered flora and fauna on the installation.

### Museum Support

CALIBRE's historians support the Laurel Grove School Museum (LGS) which presents the history of the one-room schoolhouse built by freed slaves for their children in the 1800s. CALIBRE acts as a liaison to the wider historical community and assisting LGS with research on local families. Our staff has been instrumental in LGS' website management, internship, and educational programs.
